Personal Summary

An ambitious, highly motivated, and energetic customer-oriented individual, with multiple years of experience in Hospitality. Completed a Computer Science degree with a major in Artificial Intelligence at Western Sydney University, working with Unix, MacOS, and Windows. Created mobile applications cross-platform using Swift, Android Java, and SQL, along with web applications using React.js, Node.js, PHP, JavaScript, CSS and HTML. Completed modules relating to Systems Programming 1, Data Structures and Algorithms, and Artificial Intelligence using C, C++ and Python. Developed interactive applications tailored to airport staff roles, such as flight information, security cameras, baggage tracking, task scheduling via APIs, tested on AWS and deployed on Azure using Microsoft CI/CD development. Looking to use existing knowledge gained through my degree and work experience and gain new knowledge to further my development in the IT industry.

Skills

- Outstanding people skills
- Leadership & Proactive
- Ability to work in a fast-paced environment
- Punctuality
- Time management
- Teamwork
- Professionalism
- Web & App Development
- Full Stack Development
- Collaboration
- Communication
